Project 4 Plan

1. API's I plan on using:

- Instagram
- Itunes
- Tumblr
- OMDB
- Yelp

2. Visualization tools I plan on using:

- scatter plot comparing amount of posts and ratio of followers to people the user is following (plotly)
- scatter plot comparing genres and time of song (plotly)
- bar graph comparing time of the most recent post and number of likes (plotly)
- bar graph comparing length of movie and date released over a period of time (plotly)
- scatter plot comparing price and overall rating (plotly)

3. Types of data I plan on gathering:

- Instagram: number of posts, amount of followers, amount of people the user is following
- Itunes: genre, time of song
- Tumblr: time of most recent post, number of likes
- OMDB: length of movie, date released
- Yelp: price and rating
